Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Acknowledgment is made of the after final Office action amendment filed by the applicants on March 27, 2007. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,485,172 to Sawachika et al. (hereinafter "Sawachika").

As to claim 1, Sawachika teaches/suggests a compact head mounted virtual image display unit in Figures 2 and 3, the unit comprising a microdisplay 1 and an optical system 1,2,28,29,30 for directing an image signal for viewing by a user, the image signal being generated in accordance with the microdisplay 1. (Sawachika at col. 3, ll. 38-50). An optical system mounting structure 23,24 supports the optical system 1,2,28,29,30 within the field of view of one eye 31 of the user. Id. A housing 23,24 substantially contains at least the optical system 1,2,28,29,30. (Sawachika at col. 3, ll. 15-21). A slidable light shield 23b, integrated within the housing 23,24 and having an open position and a closed position, is slidably positioned with respect to the optical system 1,2,28,29,30 such that, in the open position, the image signal is viewed by the user

Art Unit: 2629

with background light entering the optical system 1,2,28,29,30, and in the closed position, the image signal is viewed by the user with background light at least partially blocked from entering the optical system 1,2,28,29,30. (Sawachika at col. 3, ll. 22-24).

As to claim 3, Sawachika teaches/suggests wherein the light shield 23b is one of opaque, partially opaque, colored and polarized. Id.

Response to Arguments

4. Applicant's arguments, see pages 2-3, filed March 27, 2007, with respect to the rejection of claims 1 and 3 under U.S. Patent No. 5,844,530 to Tosaki have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground of rejection is made in view of Sawachika.
